

Senior Reliability Engineer

Wilde provide reliability engineering (www.WildeReliability.co.uk), finite element analysis, and computational fluid dynamics software, consulting and training services to a wide range of industries, covering mechanical, civil and manufacturing applications. We are the distributors of the internationally leading reliability software ReliaSoft for UK and Ireland to a diverse range of industry sectors, from industrial equipment and consumer products to the water, energy and even financial sectors. Reflecting strong demand for our reliability services, we are looking to appoint a Senior Reliability Engineer to enhance the current team.

Reporting to the Principal Reliability Engineer, you will be responsible for providing technical services in a range of areas related to reliability engineering, including RBD, FTA, FMEA, Weibull, RCM, DoE and FRACAS. You will also be required to provide project management services and to train and supervise junior staff.

The position offers an excellent opportunity to make a significant impact within a rapidly growing discipline, with an opportunity to develop your career in line with a strategic division of our business. You will have access to and will be provided with training in the full range of ReliaSoft products.

Ideally you will be an engineering graduate with at least 5 years post graduate industrial experience in the application of reliability engineering.

Candidate Profile

Essential skills

- Advanced level knowledge in a range of reliability engineering techniques.
- Experience applying reliability engineering techniques to industrial applications.
- Excellent verbal and written communication skills with the ability to present solutions clearly and convincingly to both large and small, technical and non-specialist, audiences at a senior level.
- Self-motivation and the drive to achieve targets.
- Good team-player .

Desirable Skills

- Previous experience using one or more of the ReliaSoft products.

Overall Responsibilities

- To provide high level technical services to support the delivery of reliability engineering products and services to the WFEA client base.

Specific Duties

- Undertake and or supervise reliability engineering consulting projects.
- Provide training services, often related to ReliaSoft.

- Provide facilitation services.
- Support business development colleagues in the sale of ReliaSoft and other RE related software.
- Provide software technical support services
- Frequent national and occasional international travel is required.

Remuneration

- Negotiable salary, based on existing skills and previous experience
- Flexible working hours, based on 37 hour week.
- 5 weeks annual leave + public holidays

Location

- Stockport, Cheshire.
